

REVIEW
for diploma project of students
Kaliyev Madiyar
Kozhakhmetov Narbek
of “IT (Computer science)” educational program
in Astana IT University
on the theme
“Development of a mobile blockchain application”

The topic of the work is very relevant, for blockchain technologies in RK in digital field.
In the first chapter theoretical part is presented.

Second chapter describes IT fully: Practical Part, Data Collection and Project Compilation, User Data Collection Method, Project Details Compilation Method, Transactional Data Logging, Data security measures, System overview .

Third chapter assigned with results and conclusions, actual bibliography also listed.

The work fully reveals the task, deserves high praise and can be submitted for defence.

The work is well written.

The bachelor diploma work of Kaliyev Madiyar, Kozhakhmetov Narbek meets all the requirements for bachelor graduation diploma work of the educational programs IT(Computer science) standards.

It can be recommended to final defence and is eligible to be rated for a grade “95(A)”.
